

MANAGEMENT DISCUSSION AND ANALYSIS

This Management Discussion and Analysis ("MD&A") is dated May 20, 2026 and is a review of Questor Technology Inc. ("Questor" or the "Company") financial condition and results of operations prepared in accordance with IFRS® Accounting Standards ("IFRS"). The focus of this MD&A is a comparison of the financial performance of the Company for the three months ended March 31, 2026 and 2025. This MD&A should be read in conjunction with the unaudited condensed consolidated financial statements for the three months ended March 31, 2026 as well as the audited consolidated financial statements of Questor as at and for the year ended December 31, 2025. This MD&A contains definitions of certain non-IFRS financial measures, included under the "Non-GAAP Financial Measures" section of this MD&A. Readers are cautioned that these measures do not have a standardized meaning prescribed by IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to "Non-GAAP Financial Measures" section at the end of this MD&A. Readers should also refer to the forward-looking information or statements included in this MD&A. See the legal advisory related to this in the *Forward-Looking Statements* section of this MD&A.

QUESTOR'S BUSINESS OVERVIEW

Questor Technology Inc., incorporated in Canada under the Business Corporations Act (Alberta) is an environmental emissions reduction technology company founded in 1994, with global operations. The Company is focused on clean air technologies that safely and cost-effectively improve air quality, support energy efficiency and greenhouse gas emission reductions. The Company designs, manufactures and services high efficiency clean combustion systems that destroy harmful pollutants, including methane, hydrogen sulfide gas, volatile organic hydrocarbons, hazardous air pollutants and BTEX (benzene, toluene, ethylbenzene and xylene) gases within waste gas streams at greater than 99.99 percent efficiency per its ISO 14034 Certification. This enables its clients to meet emission regulations, reduce greenhouse gas emissions, address community concerns and improve safety at industrial sites.

The Company also has proprietary heat-to-power generation technology and is currently targeting new markets including landfill biogas, syngas, waste engine exhaust, geothermal and solar, cement plant waste heat in addition to a wide variety of oil and gas projects. The combination of Questor's clean combustion and power generation technologies can help clients achieve net-zero emission targets for minimal cost. The Company is also doing research and development on data solutions to deliver an integrated system that amalgamates all the emission detection data available to demonstrate a clear picture of the site's emission profile.

The Company's common shares are traded on the TSX Venture Exchange under the symbol "QST". The address of the Company's corporate and registered office is 1920, 707 – 8th Avenue S.W. Calgary, Alberta, Canada, T2P 1H5.

CONSOLIDATED FINANCIAL RESULTS

For the three months ended March 31, (Stated in CDN \$)	2026	2025
Revenue	499,308	2,359,287
Gross profit	55,952	1,179,892
Adjusted EBITDA ⁽¹⁾	177,861	475,652
Profit (Loss) for the period	(114,704)	350,179
Earning (Loss) per share – basic and diluted ⁽²⁾	(0.004)	0.013

As at (Stated in CDN \$)	March 31, 2026	December 31, 2025
Working capital ⁽³⁾	3,899,550	3,877,399
Total assets	22,219,441	22,726,153
Total equity	19,689,314	19,717,988

⁽¹⁾ Non-GAAP financial measure. Refer to "Non-GAAP Financial Measures" section at the end of this MD&A.

⁽²⁾ Effective March 31, 2026, the Company increased the precision of its earnings per share presentation to three decimal places from two, to provide greater transparency.

⁽³⁾ Working capital is defined as total current assets less total current liabilities.

Total revenue for the three months ended March 31, 2026 has decreased by \$1.9 million compared to the same period in 2025. The overall decrease in revenue was primarily driven by longer sales cycles for international projects and low utilization of the rental units. Commissioning of clean combustion units delivered to Iraq and Nigeria has also been postponed to the second quarter of 2026 as those projects have experienced schedule slippage.

Gross profit as a percentage of revenue for the three months ended March 31, 2026, was 11 percent compared to 50 percent in the same period of 2025. The reduction in the gross profit margin compared to the prior year period is due to lower sales volumes, reflecting the extended closing timelines associated with international projects and low utilization of the rental units. In addition, fixed operating costs remained consistent with the prior period, which further placed downward pressure on margin during the period.

Adjusted EBITDA for the three months ended March 31, 2026 was positive \$0.2 million compared to positive \$0.5 million for the same period in 2025. The decrease in Adjusted EBITDA was primarily attributable to lower revenue and continued operating costs, partially offset by recovery on Emission Rx litigation, including \$0.2 million of fines and \$0.6 million of solicitor-client costs awarded by the Court of King's Bench.

FIRST QUARTER 2026 HIGHLIGHTS

The construction of the 1,500 kW waste-heat-to-power prototype is nearing completion, with final testing currently underway. Commissioning is scheduled to begin in Q4 2026. Meanwhile, Questor is advancing negotiations and preparations for the prototype's field demonstration, with the field deployment expected in late 2026, early 2027. In April 2026, the Company received a \$1.9 million award to complete development and launch commercialization of the 1,500 kW heat-to-power generation system from National Research Council of Canada ("NRC") through its Industrial Research Assistance Program ("NRC IRAP") (previously Sustainable Development Technology Canada "SDTC").

In February 2026, the Company received \$0.8 million in cash related to the Emission Rx litigation, consisting of a \$0.2 million court-ordered fine and \$0.6 million of solicitor-client costs awarded by the Court of King's Bench, gross of the costs of the appeal. In April 2026, the Company received \$0.2 million as the balance of the costs award for the Court of King's Bench of Alberta contempt proceedings, as well as an additional \$0.3 million related to the costs of the application to compel production of documents. In May 2026, the Company received further recovery for the costs of appeal of \$0.1 million. In aggregate, the Company recovered \$1.4 million in cash related to the Emission Rx litigation and associated proceedings, with amounts received in and after the first quarter of 2026.

As of April 20, 2026, the Company has announced the departure of its President and Chief Executive Officer ("CEO"), Audrey Mascarenhas, and the appointment of Mike Lindsay as an interim CEO. Following the departure, all previously granted and outstanding share-based compensation awards held by Ms. Mascarenhas were forfeited.

MARKET OUTLOOK

Amid ongoing global political and economic uncertainty, the European Union's evolving climate policy framework is accelerating demand for credible, verifiable methane reduction technologies. In 2024, global gas flaring reached approximately 151 billion cubic metres, or 14.6 billion standard cubic feet per day, the highest level since 2007, wasting an estimated \$63 billion USD in energy. Against this backdrop, regulatory and market expectations are shifting decisively. While methane is not currently within the scope of the European Union's Carbon Border Adjustment Mechanism ("CBAM"), which addresses embedded carbon dioxide emissions in select industrial goods beginning in 2026, methane emissions from oil and gas are now governed through a separate and complementary legal framework. Regulation (EU) 2024/1787 on the reduction of methane emissions in the energy sector, which entered into force in August 2024, introduces mandatory measurement, reporting, and verification requirements, a ban on routine venting and flaring, and methane transparency obligations that extend to imported crude oil and natural gas. Beginning in 2027, EU importers will be required to demonstrate that upstream methane emissions associated with their supply chains are monitored and verified to standards equivalent to those applied to EU producers, with methane intensity requirements tightening toward 2030.

These developments reflect a structural change in how emissions performance is measured, verified, and valued. Methane reduction is no longer addressed through voluntary commitments or self-reported data alone. Advances in monitoring, combined with enforceable regulation, are making independently verified performance an increasingly important prerequisite for market access and long-term competitiveness. More than 150 countries have joined the Global Methane Pledge, committing to a 30 percent reduction in methane emissions by 2030, yet the International Energy Agency estimates that only five percent of global oil and gas production currently meets near-zero methane emissions standards. The gap between policy ambition and operational reality is creating sustained demand for scalable, demonstrably effective technologies such as those offered by Questor.

This dynamic is particularly evident in the Middle East and North Africa ("MENA") region, where a small number of producing countries account for more than 30 percent of global flared volumes while producing approximately 10 percent of the world's oil. In markets such as Iraq and other emerging producers, routine flaring and venting are not always explicitly prohibited by statute; however, operators are increasingly compelled, through environmental legislation, contractual obligations, and national policy targets, to demonstrate real and measurable emissions reductions. This environment supports long-term, structural demand for methane abatement and high efficiency combustion solutions that is largely independent of short-term political volatility. Recent regulatory developments in the United Arab Emirates, including the introduction of legally enforceable greenhouse gas measurement, reporting, and verification requirements, further reinforce the regional shift toward validated emissions performance across both operators and service providers.

Questor is seeing opportunities emerge across these markets. Units deployed in Iraq, Nigeria, and Mexico have been installed as demonstration projects to validate a low-cost, highly effective solution capable of supporting national energy transition goals, improving air quality, and addressing local community concerns. In Mexico, deployment has progressed more slowly than originally anticipated; however, recent developments have strengthened the long-term opportunity. The Company is engaged in discussions with Pemex regarding the elimination of flares and the use of recovered waste heat to generate electricity for adjacent communities. This integrated approach, combining methane abatement with local power generation, underscores the potential for emissions reduction solutions that deliver both environmental and social benefits.

Questor's ISO 14034 certified clean combustion system achieves greater than 99.99 percent combustion efficiency. The Company remains the only provider in the enclosed combustion industry globally to hold ISO 14034 verification, an increasingly material distinction as EU methane import requirements take effect and international and national oil companies place growing emphasis on independently verified, third party validated performance. In parallel, Questor continues to advance its 1,500 kW Organic Rankine Cycle waste-heat-to-power technology, with field demonstration targeted for late 2026, early 2027, subject to final testing outcomes.

While international expansion introduces variability in execution timing, reflecting geopolitical conditions, logistics, permitting, and counterparty readiness, the underlying demand signal remains intact. During the year, Questor delivered multiple international units in record time, demonstrating its ability to execute efficiently even in complex operating environments. The Company has completed start-up of its Libya installation for

TotalEnergies and SLB and is currently mobilizing to Nigeria to complete start-up activities there. Commissioning of the Iraq installation is expected to proceed, subject to the resolution of the ongoing regional conflict.

Our strategic priorities remain clear: executing on the international contract backlog to establish reference installations; expanding recurring aftermarket and service revenue from a growing installed base; and leveraging durable regulatory signals, particularly the EU's methane import requirements, to support disciplined regional expansion. With a debt free balance sheet, a differentiated and independently verified technology platform, favourable structural regulatory tailwinds, and equipment available in inventory to meet growing demand, Questor is well positioned to convert early international deployments into sustained, recurring revenue over time, notwithstanding variability in project timing.

FIRST QUARTER FINANCIAL OVERVIEW

For the three months ended March 31, (Stated in CDN \$)	2026	2025
Revenue	499,308	2,359,287
Cost of sales	443,356	1,179,395
Adjusted EBITDA ⁽¹⁾	177,861	475,652
Gross profit	55,952	1,179,892
Percentage of gross profit to revenue	11	50

⁽¹⁾ Non-GAAP financial measure. Refer to "Non-GAAP Financial Measures" section at the end of this MD&A.

REVENUE

Revenue for the three months ended March 31, 2026 is comprised of:

Equipment Sales

Equipment sales revenue for the three months ended March 31, 2026 was \$0.1 million compared to \$1.9 million for the same period in 2025. The significant decrease in revenue was primarily attributable to extended sales cycles for international projects and the deferral of commissioning for clean combustion units delivered to Iraq and Nigeria into the second quarter of 2026, reflecting schedule delays on those projects.

Equipment Rentals

Equipment rental revenue for the three months ended March 31, 2026 was \$0.4 million compared to \$0.4 million for the same period in 2025. Rental revenue in the first quarter of 2026 reflected lower utilization rates of rental units in the United States, partially offset with rental revenue generated in Mexico.

ADJUSTED EBITDA

Adjusted EBITDA for the three months ended March 31, 2026 was positive \$0.2 million compared to positive \$0.5 million for the same period in 2025. The decrease in Adjusted EBITDA was primarily attributable to lower revenue and continued operating costs, partially offset by recovery on Emission Rx litigation, including \$0.2 million of fine and \$0.6 million of solicitor-client costs awarded by the Court of King's Bench.

GROSS PROFIT

Gross profit as a percentage of revenue for the three months ended March 31, 2026, was 11 percent compared to 50 percent in the same period of 2025. The reduction in the gross profit margin compared to the prior year period is due to lower sales volumes, reflecting the extended closing timelines associated with international projects and low utilization of the rental units. In addition, fixed operating costs remained consistent with the prior period, which further placed downward pressure on margin during the period.

CORPORATE COSTS

For the three months ended March 31, (Stated in CDN \$)	2026	2025
Gross profit	55,952	1,179,892
Less corporate costs:		
Administration expenses	826,240	863,520
Research and development expenses	30,181	89,058
Share based payments	80,821	33,951
Depreciation expense	21,358	20,461
Reversal of impairment of non-financial assets	-	(128,446)
Net foreign exchange gains	(37,880)	(17,385)
Other income	(772,286)	(31,732)
Profit (Loss) before tax	(92,482)	350,465
Income tax expense	22,222	286
Profit (Loss) for the period	(114,704)	350,179

Administration Expenses

Administrative expenses were consistent for the first quarter 2026 compared to the same period in 2025.

Research and development expenses

Research and development costs were lower than in the corresponding period of 2025, because the 1,500 kW waste-heat-to-power prototype progressing into its concluding phase.

Share-based payments

Share-based payments in the first quarter of 2026 decreased compared to the first quarter of 2025, reflecting no equity grants issued to officers and employees in 2025.

Depreciation

Depreciation is consistent year over year as there have been no significant capital additions in the first quarter of 2026.

Net foreign exchange gains

Foreign exchange gains and losses for the Company fluctuate primarily based on the change in the US dollar relative to the CDN dollar.

Other income

Other income mainly consists of amounts recovered in connection with the Emission Rx litigation, including a \$0.2 million fine and \$0.6 million of solicitor-client costs awarded by the Court of King's Bench.

Income tax expense

Income tax expense is recognized based on Management's best estimate of the weighted average annual effective income tax rate expected for the year. The treatment of deferred tax assets remains unchanged from December 31, 2025 and will be reviewed on an ongoing basis.

LIQUIDITY AND CAPITAL RESOURCES

Liquidity risk is the risk that the Company will encounter difficulties in meeting its financial liability obligations. The Company manages its liquidity risk through cash, short-term investments and debt management, which includes monitoring forecasts of the Company's cash and cash equivalents on the basis of projected cash flow.

The Company has positive net working capital of \$3.9 million as at March 31, 2026 (December 31, 2025 - \$3.9 million).

Cash flow for the three months ended March 31, (Stated in CDN \$)	2026	2025
Cash provided by (used in):		
Operating activities	(271,650)	(933,573)
Investing activities	303,794	(156,350)
Financing activities	(65,638)	(145,788)
Decrease in cash	(33,494)	(1,235,711)

Operating Activities

The Company had a cash outflow from operations of \$0.3 million for the first quarter of 2026, compared to cash outflow of \$0.9 million for the same period in 2025. The reduction in cash outflows from operating activities was mainly attributable to lower direct costs associated with decreased equipment sales, as well as the receipt of litigation related recoveries during the period.

Investing Activities

During the three months ended March 31, 2026, the Company invested \$0.1 million in the development of the Company's waste-heat-to-power research and development project and redeemed net \$0.4 million cash from its highly liquid short-term investments.

Financing Activities

Cash used in financing activities for the three months ended March 31, 2026 of \$0.1 million is primarily related to lease payments for office and shop space.

SHARE CAPITAL

The Company has share-based payment plans comprising of restricted, performance, and deferred share unit plans as well as a stock option plan. The maximum number of equity-based compensation units in aggregate under these plans that may be reserved for issuance shall not exceed 10 percent of the outstanding common shares of the Company. As at the date of this MD&A, there were 1,045,214 share-based payments issued and outstanding.

SUMMARY OF QUARTERLY RESULTS

	Mar 31, 2026	Dec 31, 2025	Sep 30, 2025	Jun 30, 2025	Mar 31, 2025	Dec 31, 2024	Sep 30, 2024	Jun 30, 2024
For the three and twelve months ended (CND\$ '000's except amounts per share)								
Revenue	499	731	683	3,023	2,359	1,776	1,143	870
Gross profit (loss)	56	51	(162)	1,590	1,180	595	384	42

Profit (Loss) for the period	(115)	(1,077)	(1,259)	363	350	(1,041)	(589)	(966)
Per share – basic and diluted ⁽¹⁾	(0.004)	(0.039)	(0.046)	0.013	0.013	(0.038)	(0.021)	(0.035)

⁽¹⁾ Effective March 31, 2026, the Company increased the precision of its earnings per share presentation to three decimal places from two, to provide greater transparency.

COMMITMENTS AND CONTINGENCIES

The Company has lease commitments for premises and storage facilities as disclosed in note 22 of the 2025 annual financial statements. As at March 31, 2026, the Company had no purchase commitments for materials required to build the 1,500 kW prototype unit for its waste-heat-to-power research and development project (December 31, 2025 - \$nil).

The Company filed a claim against three former employees and their company, Emission Rx. The three former employees left the Company over a period of two months, in 2018. After the former employees left, the Company learned that the former employees had incorporated Emission Rx on November 14, 2017, several months prior to their departures, and had developed a low-pressure burner technology which they then marketed and sold through Emission Rx. The Company sought injunctive relief to prevent Emission Rx from competing in the market against the Company and infringing the Company's intellectual property.

The Company asserts ownership of Emission Rx's LP Burner Technology, through: (i) the terms of the employment agreements signed by the three former employees; or (ii) the application of the common law. In June 2024, the Court of King's Bench of Alberta held the former employees in contempt of court for withholding and giving false sworn evidence to the Court. In August 2025, the Court of Appeal of Alberta upheld the contempt finding. The "sanction" or "penalty" phase of the contempt hearing was heard in December 2025. In January 2026, the Court of King's Bench of Alberta issued its sanction decision, fining the former employees \$150,000 plus solicitor-client costs of the contempt proceedings.

The litigation is ongoing. Notwithstanding the uncertainty as to the outcome, based on the information currently available, the Company does not believe the outcome of this litigation will have a material adverse effect on its consolidated financial position.

From time to time, the Company is also subject to other legal proceedings, settlements, investigations, claims and actions arising in the normal course of business. While the final outcome of such actions and proceedings cannot be predicted with certainty, the Company believes that the resolution of such matters will not have a material impact on the Company's financial position or results of operations as at March 31, 2026.

FINANCIAL RISK MANAGEMENT

The Company's financial instruments consist of cash and cash equivalents, investments, trade and other receivables, contract assets trade payables, accrued liabilities and provisions. The Company did not hold or issue any derivative financial instruments during the period.

Fair values

The carrying amounts of the current financial assets and current financial liabilities recognized in the Company's consolidated financial statements at the end of each reporting period approximate their fair value due to their short period to maturity. Judgment is required in interpreting market data to develop the estimates of fair value. These estimates are not necessarily indicative of the amounts we could realize in current markets.

Credit risk

Credit risk arises from the potential that one or more counterparties fail to meet their obligations. A substantial amount of the Company's trade and contract receivables, which relate to the Company's revenues, are with customers in the oil and gas industry and are subject to normal industry credit risks. The Company mitigates this risk through its credit policies and practices including the use of credit limits and approvals, and by monitoring the financial condition of its customers. Payment terms with customers vary by contract. The maximum exposure to credit risk of cash, trade receivables, unbilled contract assets and other receivables is their respective carrying values.

The Company is also exposed to the risk of dependence on a few customers for a significant amount of the Company's revenue. This is to be expected given the complexity involved in engineering solutions for each client's needs to ensure our products operate safely within parameters. The Company notes that equipment sales revenue which comprises a significant portion of total revenue, generally relates to a small number of customers each year but these customers change each year. The Company bills and collects equipment revenue throughout the contract which reduces collection risk. There is a concentration of equipment sales and equipment rental and related service revenue that is associated to the equipment and rental revenue. For the three months ended March 31, 2026, four customers represented 85 percent of total revenue, (for the three months ended March 31, 2025 – three customers represented 76 percent).

Liquidity risk

The Company's principal sources of liquidity are cash and cash equivalents, investments, operating cash flows, existing or new credit facilities and new share equity. The Company monitors its liquidity to ensure it has sufficient funds to complete planned capital and other expenditures. The Company mitigates liquidity risk by maintaining adequate banking and credit facilities and monitoring its forecast and actual cash flows. The Company may also adjust its capital spending to maintain liquidity. The Company has positive net working capital as of March 31, 2026 of \$3,899,550 (December 31, 2025 - \$3,877,399).

Foreign currency risk

The Company is exposed to foreign exchange risk associated with foreign operations where assets, liabilities, revenue and costs are denominated in US dollars. The impact of this exposure is recorded as a cumulative translation adjustment in other comprehensive income (loss).

The Company is also exposed to the impact of foreign currency fluctuations in its Canadian operations on sales and purchases of products and services from vendors primarily in the US currency which resulted in a foreign exchange gain of \$37,880 for the three months ended March 31, 2026 (2025 – gain of \$17,385). The Company mitigates some of the foreign currency risk by keeping a US dollar bank account to receive US payments and fund US dollar purchases in the Canadian entity.

RELATED-PARTY TRANSACTIONS

The Company defines key management personnel as being the members of the Board of Directors, Chief Executive Officer ("CEO"), and Chief Financial Officer ("CFO"). In addition to their salaries and directors' fees, the Company also provides non-cash benefits including participation in the Company's stock option, RSU, PSU and DSU plans.

As of April 20, 2026, the Company announced the departure of its President and CEO, Audrey Mascarenhas. In line with the CEO employment agreement in effect at the time of termination, the Company paid the CEO unpaid annual salary through to the date of termination and accrued but unpaid vacation.

ACCOUNTING POLICIES AND NEW ACCOUNTING PRONOUNCEMENTS

The Company's material accounting policies and future accounting pronouncements are included in the Annual Consolidated Financial Statements for the year ended December 31, 2025.

In April 2024, the IASB issued new IFRS 18 - Presentation and Disclosure in Financial Statements ("IFRS 18") replacing IAS 1. The new guidance is expected to improve the usefulness of information presented and disclosed in the financial statements of companies. IFRS 18 is effective for annual reporting periods beginning on or after 1 January 2027, with early adoption permitted. The Company is currently assessing the impact of this new IFRS accounting standard on its consolidated financial statements.

The amendment to IFRS 9, Financial Instruments ("IFRS 9") and IFRS 7, Financial Instruments: Disclosures ("IFRS 7") clarifies the date of recognition and derecognition of some financial assets and liabilities, including a new exception for certain financial liabilities settled through an electronic payment system before the settlement date. The amendment is effective for annual periods beginning on or after January 1, 2026 with earlier adoption permitted. The adoption of these amendments did not have a material impact on the Company's consolidated financial statements.

CRITICAL ACCOUNTING ESTIMATES

The preparation of the consolidated financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect the reported assets, liabilities, revenues, expenses and the disclosure of contingencies. Actual results may differ significantly from these estimates. Descriptions of the critical accounting judgements, estimates and assumptions are set out in annual audited consolidated financial statements for the year ended December 31, 2025.

BUSINESS RISKS

The business of Questor is subject to certain risks and uncertainties. Prior to making any investment decision regarding Questor, investors should carefully consider, among other things, the risk factors set forth in the Company's most recently filed Annual MD&A, which are specifically incorporated by reference herein.

NON-GAAP FINANCIAL MEASURES

The Company views Adjusted EBITDA as the key financial measure for the underlying operating performance of the Company and considers it to be useful supplemental measure to our analysts, investors and other users.

Adjusted EBITDA does not have any standardized meaning as prescribed by IFRS and therefore is considered a non-GAAP measure and may not be comparable to similar measures presented by other issuers.

Adjusted EBITDA is defined as net income or loss for the period less interest, taxes, depreciation and amortization, foreign exchange losses (gains), non-cash stock-based compensation, impairment charges and gains and losses that are extraordinary or non-recurring. Adjusted EBITDA includes litigation related legal costs and associated recoveries, consistent with historical presentation. Recovery amount has been separately identified in the MD&A to enhance transparency. Adjusted EBITDA is presented because it gives an indication of the results from the Company's principal business activities prior to consideration of how its activities are financed and the impact of foreign exchange, taxation and depreciation and amortization charges. Adjusted EBITDA was calculated as follows:

For the three months ended March 31, (Stated in CDN \$)	2026	2025
Profit (Loss) for the period:	(114,704)	350,179
Add back (deduct):		
Income taxes expense	22,222	286
Interest income	(8,516)	(34,182)
Depreciation of property and equipment and right-of-use assets ⁽¹⁾	235,918	271,249

Reversal of impairment of non-financial assets	-	(128,446)
Net foreign exchange gains	(37,880)	(17,385)
Stock based compensation	80,821	33,951
Adjusted EBITDA	177,861	475,652

⁽¹⁾ Includes depreciation presented as a part of costs of sales

ADVISORIES-FORWARD LOOKING STATEMENTS

In order to provide the Company shareholders and potential investors with information regarding the Company and its subsidiaries, including management's assessment of the Company's plans and future operations, certain statements contained in this MD&A, including statements that contain words such as "seek", "anticipate", "plan", "continue", "estimate", "expect", "may", "will", "project", "predict", "potential", "targeting", "intend", "could", "might", "should", "believe", "forecast" or similar words suggesting future outcomes, are forward-looking statements.

In particular, forward-looking statements in this MD&A include, but are not limited to, statements with respect to expected operating strategies and targets, capital expenditure programs, future financial resources, use of funds, anticipated equipment utilization levels, future oil and natural gas well activity in each of the Company's operating jurisdictions, results of acquisitions, the impact of environmental regulations and economic reforms and sanctions on the Company's business, future costs or potential liabilities, projections of market prices and costs and customer demand, supply and demand for the Company's products and services, expectations regarding the Company's ability to maintain its competitive position, anticipated benefits of the Company's competitive position, expectations regarding the Company's ability to raise capital, treatment under government regulatory regimes, commodity prices, anticipated outcomes of specific events, trends in, and the growth prospects of, the global energy industry, the Company's growth prospects including, without limitation, its international growth strategy and prospects, and the impact of changes in accounting policies and standards on the Company and its financial statements. These statements are derived from certain assumptions and analyses made by the Company based on its experience and perception of historical trends, current conditions, expected future developments and other factors that it believes are appropriate in the circumstances, including, but not limited to, the economic and political environment in which the Company operates, the Company's expectations for its current and prospective customers' capital budgets and geographical areas of focus, the Company's existing contracts and the status of current negotiations with key customers and suppliers, the effect unconventional gas projects have had on supply and demand fundamentals for natural gas and the likelihood that the current tax and regulatory regime will remain substantially unchanged.

Forward-looking statements are subject to several known and unknown risks and uncertainties that could cause actual results to differ materially from the Company's expectations. Such risk factors include: general economic conditions in Canada and globally; volatility in market prices for oil and natural gas and the effect of this volatility on the demand for oilfield services generally; competition; liabilities and risks, including environmental liabilities and risks, inherent in oil and natural gas operations; changes in legislation and the regulatory environment; sourcing, pricing and availability of raw materials, components, parts, equipment, suppliers, facilities and skilled personnel; the ability to integrate technological advances and match advances by competitors; the availability of capital on satisfactory terms; intellectual property risks; trade-related risks such as tariffs; uncertainties in weather and temperature affecting the duration of the service periods and the activities that can be completed; dependence on, and concentration of, major customers; the creditworthiness and performance by the Company's counterparties and customers; liabilities and risks associated with prior operations; the effect of accounting pronouncements issued periodically; failure to realize anticipated benefits of acquisitions and dispositions; and currency exchange rate risk. Further information about these and other risks and uncertainties may be found under "Business Risks" above.

Consequently, all of the forward-looking statements made in this MD&A are qualified by these cautionary statements and there can be no assurance that actual results or developments anticipated by the Company will be realized, or that they will have the expected consequences or effects on the Company or its business or operations. These statements speak only as of the respective date of this MD&A or the document incorporated by reference herein. The Company assumes no obligation to update publicly any such forward-looking statements, whether as a result of new information, future events or otherwise, except as required pursuant to applicable securities laws.
